PROFILE

Laravel backend developer with production experience since December 2024. I work on travel-operations ERP exchange, finance approvals, scheduled jobs, alerts and releases. Kesari Select operates at a reported 10K+ inquiries/day and roughly 700-1,000 internal users; I contribute to its Laravel application and production deployments.

TECHNICAL STACK

Backend: PHP, Laravel, REST APIs, Frappe ERP, Guzzle, Queues & Scheduler, Blade, Livewire
Data & infra: MySQL, MongoDB, PostgreSQL, AWS S3/SES/EC2, Docker, Nginx, PHP-FPM, Linux, SSL, Git, DBF/Excel

PROFESSIONAL EXPERIENCE

Laravel Developer - Shine Infosoft, Ahmedabad May 2025 - Present

- Built and evolved ERP-to-S3 DBF exports for booking, receipt, passenger, supplier, billing and forex data; introduced schedules, staging/live separation, archives and missed-record lookback checks.
- Built Cash Contra requisitions and extended Sales Manager to Finance approval flows for journal vouchers, with notifications, role checks and export-ready finance records.
- Handled Laravel deployments end-to-end using Docker, AWS EC2, Nginx, PHP-FPM and SSL, including production debugging and post-deployment verification.
- Worked across air tickets, receipts, insurance and sales/ops alerts; built RFQ reminders, low-ticket-stock checks and operational log tooling.
- Reduced an observed page load from ~15 seconds to ~3 seconds (~80% less wait time) through backend optimization; timing based on personal operational measurements.

PHP Developer - Magecurious, Ahmedabad Dec 2024 - May 2025

- Worked on live PHP assignments, backend fixes and business workflows with senior-developer reviews.

SELECTED ENGINEERING WORK

Bulk Email Campaign Engine Laravel 11 | Queues | MySQL | Excel

- Built Excel-to-email campaigns with validation, test sends, queued dispatch and pause/resume. Moved tracking-pixel open events to hourly file-based batch persistence instead of a DB write per request.

Smart Print Operations Laravel | MySQL | RBAC | AJAX

- Built inquiry intake and RBAC improvements using Eloquent, AJAX, scoped joins and upsert-style permission updates; added task soft deletes and improved configurable print/prepress job sheets.

EDUCATION & RECOGNITION

MCA - Master of Computer Applications (final year, pursuing) | BCA - Completed
Workshop Facilitator - Dr. Subhash University (Aug 2026): practical Git and Docker workshop for BCA/MCA students with live setup demos.
Grand Finalist - New India Vibrant Hackathon 2023, Pandit Deendayal Energy University (PDEU): selected from the regional round, presented a backend-focused project at the Grand Finale, defended architecture decisions before judges and mentors, and worked with teammates under tight deadlines.

Platform scale and performance figures are developer-reported operating estimates, not audited analytics.
