PROFILE

Laravel backend developer with production experience since Dec 2024. I build and maintain business-critical workflows, integrate ERP systems and own deployments from setup to production checks. At Kesari Select, my work supports 10K+ total inquiries, roughly 80-100+ new inquiries/day and an estimated 700-1,000 team users across Sales, Land Ops, Air Ops, Cashier, Product and Finance.

CORE SKILLS

PHP, Laravel, REST APIs, Frappe ERP, MySQL, MongoDB, PostgreSQL, Queues/Workers, Artisan Scheduler, Excel import, DBF exports, AWS S3/SES/EC2, Docker, Nginx, PHP-FPM, Linux, SSL, Git, Blade, AJAX.

PROFESSIONAL EXPERIENCE

Laravel Developer - Shine Infosoft, Ahmedabad May 2025 - Present

- Own Laravel application releases end to end across Docker, AWS EC2, Nginx, PHP-FPM and SSL; configure environments, deploy changes, verify releases and troubleshoot production issues.
- Improved ERP-to-finance data reliability through scheduled file generation, S3 staging, archive flows, export logs and recovery checks for missed records.
- Designed approval checks, operational alerts and integrations supporting cross-functional teams; worked on complex business workflows rather than isolated CRUD screens.
- Reduced a slow production page's observed load time from about 15s to 3s (roughly 80% less wait time) based on before/after operational measurements.

PHP Developer - Magecurious, Ahmedabad Dec 2024 - May 2025

- Delivered PHP backend enhancements, fixed workflow issues and collaborated through code review and release cycles.

SELECTED ENGINEERING WORK

Email Campaign Platform Laravel / MySQL / Queues

- Designed batch-optimized Excel ingestion that inserted 10K+ recipient records in under 4 seconds (developer-reported). Laravel Queues/Workers handle actual email sending asynchronously; import speed is not delivery speed.
- Built campaign progress tracking, pause/resume, rich editor, strict Excel validation, dynamic {Name}/{Email} placeholders, test messages and error-handling flows.

Smart Print Operations Laravel / MySQL / RBAC

- Improved inquiry intake, permission-aware actions, soft-delete behavior and job data consistency in an existing print operations application.

EDUCATION AND ACHIEVEMENTS

MCA - Master of Computer Applications (final year, pursuing) | BCA - Completed
Workshop Facilitator - Dr. Subhash University (Aug 2026). Led a hands-on Git and Docker session for BCA/MCA students.
Grand Finalist - New India Vibrant Hackathon 2023, Pandit Deendayal Energy University (PDEU). Selected from the regional round for the Grand Finale; built and presented a backend-focused solution under time pressure, defended architecture decisions before judges and mentors, and collaborated on delivery.

Scale and performance measurements are developer-reported estimates, not independently audited.
